Leed Quality Products

Top quality of EVI products quality for LEED (leadership in energy and environmental design) credit EQ 4.2, following the VOC level as of Rules 1113 of architectural coating as per the last update.

What is sustainable development?

Sustainable development (SD) refers to a mode of human development in which resource use aims to meet human needs while ensuring the sustainability of natural systems and the environment so that these needs can be met not only in the present, but also for generations to come.

What is naturally responsible approach?

An environment friendly attitude is increasingly spreading aiming at safe guarding the operators and the end user's health. For this reason, furnitures are more and more being coated with products with the lead emission of solvents, both during the painting stage and in the final slow stage of the drying which usually liberates unpleasant odours. As furniture manufacturers use chipboard bases and MDF with low form aldehyde contents, painters will have to use products with minimum contents of harmful substances so as to protect the environment.

Product List

Water Base

(VOC less than 25g/l less water and less exempt solvent as per Rule 113 of architectural coating) of SCAQMD of the State of California - USA

1 Pack

LEED 10245
LEED 1025X
LEED 10246
LEED 1026X

Solvent Base

(VOC less than 275g/l less water and less exempt solvent as per Rule 113 of architectural coating) of SCAQMD of the State of California - USA

2 Packs

LEED 1435
LEED 158X (0,1,2,3,4)
LEED 1003
LEED 1456
LEED 156X (0,1,2,3,4)
LEED 1009
