

# STAIN MIX SYSTEM

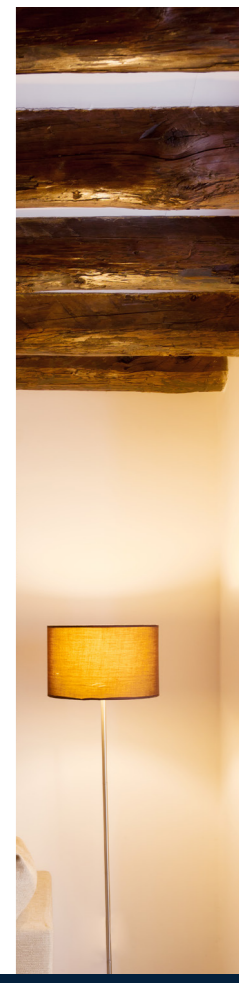

## BRIEF INTRODUCTION:

Tinting of wood is an old tradition used by several civilizations and industries to modify the original wood color while preserving and highlighting its natural beauty and characteristics. EVI offers an array of products of different specifications, meeting the various demands and needs esthetically and technically of its clientele. EVI Stain Mix System is easy to use, dedicated to those working in the wood industry providing formulation and preparation processes of an extensive range of wood stains. The system provides EVI's customers with the needed tools to take full control over the coloring process, production time and costs eliminating the set of problems they face with color discrepancies, delivery delays and more.

The system was not only conceived to facilitate the task of staining, but to also provide the clients with the know how of producing their own stains. The Stain Mix System is very effective, flexible and comprehensive given that it enables the client to edit and customize 150 preset of colors into thousands of other shades to match his own needs and projects and save them in his archive for future reference in addition to controlling the exact quantity he needs.

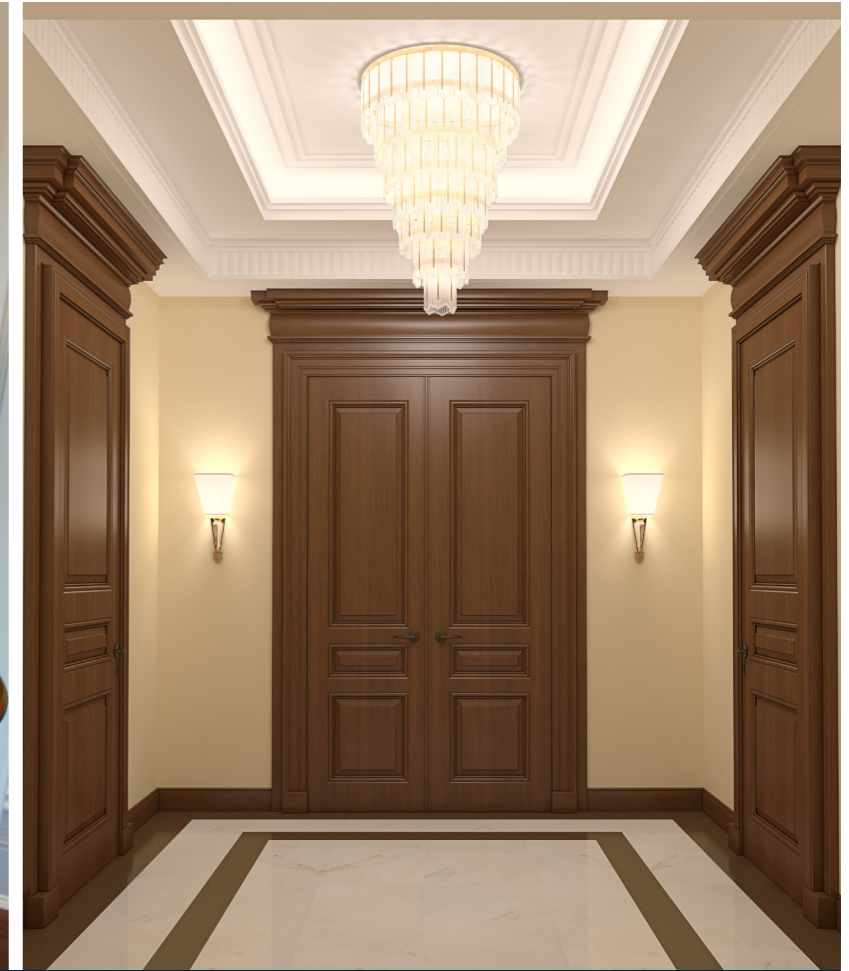

The Stain Mix System comes with a software CD and catalogue including the step by step instructions on how to use the system. This complete process enables the user to obtain thousands of shades other than the 150 colors available in the provided color chart. The colors are achieved by simply combining the 13 available stain pastes diluting them with WSB.

## ADVANTAGES:

- ▶ Stop waste mix as much as you need, by a minimum of 1/2 Kg.
- ▶ Lower purchase cost, resulting from the difference in cost with pre-diluted/ready to use stains.
- ▶ Reduce stocks of various quantities of different stain colors.
- ▶ Save production time & control delivery delays.
- ▶ Become autonomous by producing your stains, any time in any quantity.
- ▶ Customize your colors & concentrations obtaining thousands of colors out of 150 preset shades.
- ▶ Eliminate colors discrepancy & ensure consistent replicability.
- ▶ Dilute with both solvent & water.
- ▶ Keep records regarding clients' projects history for an extended period of time.

## COMPONENTS:

It is composed from concentrated universal stain pastes, Water & Solvent Base converter and a EVI innovative computer software.

## UNIVERSAL STAIN PASTES:

They consist of 13 different colors divided as per the below:

E/22210	UNIVERSAL STAIN PASTE WHITE
E/22220X2	UNIVERSAL STAIN PASTE ORANGE
E/22230X2	UNIVERSAL STAIN PASTE DARK YELLOW
E/22231	UNIVERSAL STAIN PASTE YELLOW
E/22232	UNIVERSAL STAIN PASTE LEMON YELLOW
E/22240	UNIVERSAL STAIN PASTE DARK BLUE
E/22241	UNIVERSAL STAIN PASTE BLUE
E/22242	UNIVERSAL STAIN PASTE LIGHT BLUE
E/22250X2	UNIVERSAL STAIN PASTE BROWN
E/22260X2	UNIVERSAL STAIN PASTE BLACK
E/22271	UNIVERSAL STAIN PASTE RED
E/22280	UNIVERSAL STAIN PASTE BORDEAUX
E/22293	UNIVERSAL STAIN PASTE GREEN

## WATER & SOLVENT BASE CONVERTER

WSB is a dilution for the Concentrated Universal Stain Pastes used to ensure that the final stain product can be diluted with any kind of thinner or water excluding the white spirit.

## EVI COMPUTER SOFTWARE:

through a computer, with our own EVI Software, you will be able to access our ready formulated stain colors, by choosing the stain color number from EVI special Stain Mix catalogue, determining the quantity you need and getting the exact quantity needed from each component.

## FAN DECK:

The fan deck includes 150 real wood applied samples showcasing the basic Stain Mix colors out of which the client can generate thousands other colors.

## FULL SET OF LABORATORY ITEMS:

**The set will cover laboratory items such as:**

- ▶ Beakers of 100 ml, 500ml, 1 Liter and 2 Liters
- ▶ Graduated Cylinder of 100ml and 250 ml
- ▶ Spatula of 200ml

EVI also offers an optional digital scale to ensure accurate measurements.

## HOW IT WORKS:

Starting with 13 concentrated universal stain paste tints, clients will be able to produce the other 150 predefined concentrated stains and many others, by mixing together 2 to 4 of the 13 base stains. The percentages of the bases to be mixed have been precisely formulated to enable the clients to create small quantities of stain while minimizing the margin of error. The stains can be produced either by weight or by volume depending on the client's preference.
